couple problems ive encountered Posted by t3h anarchist - 2009/03/25 07:01
there are two major problems i have encountered in the last few months
number 1: after you write a review, if you accidentally enter the wrong captcha words, then it just blanks out and you have to rewrite the whole review
number 2: not all forum posts are displayed on the new posts section of the home screen
Re:couple problems ive encountered Posted by admin - 2009/03/25 07:22
Thanks for notifying me about these problems.
#1: I just discovered that you don't lose your review nor ratings in Internet Explorer, but you do in Firefox.
#2: I'm aware of this one. I'll have to do some upgrades to the database and forum software at some point to get it fixed.

#1: yup i use firefox

#2: awesome
